## Report of the World Championship C classes in Galati - Romania

The year 2018 is regular for organizing a World Championship C. Initially there was an application from Chech Republic, but when that turned out to be impossible, the Romanian federation was prepared to organize this championship. The preparations, such as finding a location, sponsors and everything more started in 2016.

At the general meeting in Oberhausen there was a presentation with a colorful brochure.

The start of the event was on Saturday 1 September and lasted until Saturday 8 September. Dieter Matsik was for Naviga present and I was there as main judge. 200 models from 12 countries have been registered. The local university had made the auditorium available and that was a stylish location.

At the official opening ceremony on Sunday, prominent people were present, such as the Mayor of Galati, Director of the university and sponsors. All this was well prepared in to the detail.

The quality of the registered models was particularly high, with the result that many medals were awarded. The traditional party night / banquet was held on Friday evening, with good food and drinks. It was successful and very pleasant.

Saturday afternoon 8 September the closing ceremony was held with handing out the medals,

Again in the presence of mayor and representative of the university.

In summary, I am very satisfied with this championship, such as the location and the work of the organization team led by Ioana Dumitru and Daniël Ciosu.
