

FASTCAST POLYURETHANE RESIN FOR THIN PARTS **DEMOLDING TIME 20 MINUTES**

APPLICATIONS

Casting of prototypes and small-scale models in silicone moulds.

PROPERTIES

- Fast demoulding time
- Easy-to-use mix ratio (1:1 by weight)
- Low chemical attack towards silicone moulds
- Opaque even in small thickness
- Good ability for being painted

PHYSICAL PROPERTIES						
Composition		POLYOL	ISOCYANATE	MIXING		
Mixing ratio by weight Mixing ratio by volume at 25°C		100 100	100 86			
Aspect		liquid	liquid	liquid		
Colour		off-white	dark amber	beige		
Brookfield LVT viscosity at 25°C (mPa.s)	-	35	35	35		
Density of parts before mixing Density of cured mixing	ISO 1675 : 1985 ISO 2781 : 1988	0.98	1.14	- 1.08		
Pot life at 25°C on 200g (min.)	-			2.0		

MECHANICAL PROPERTIES AT 23°C (1)						
Hardness	ISO 868 : 2003	Shore D1 / D15	74 / 72			
Flexural modulus of elasticity	ISO 178 : 2001	MPa	1.100			
Flexural strength	ISO 178 : 2001	MPa	48			
Charpy impact resistance	ISO 179/1D :1994	kJ/m ²	15			

⁽¹⁾ Average values obtained on standard specimens / Hardening 7 days.

PROCESSING CONDITIONS

Before use Polyol must be mixed until both colour and aspect become homogeneous. Both parts (Polyol and Isocyanate) must be mixed at a temperature above 18°C according to the mix ratio indicated on this technical data sheet. Before casting check that parts or moulds are free of any trace of moisture.

Silicone Elastomer ESSIL 125 is particularly well suited to the production of moulds for casting F32. Casting thickness of no more than 5 mm is advised.

AXSON JAPAN

FASTCAST POLYURETHANE RESIN FOR THIN PARTS DEMOLDING TIME 20 MINUTES

THERMAL AND SPECIFIC PROPERTIES (1)					
Glass transition temperature	ISO 11359 : 2002	°C	100		
Demolding time at 23°C - (2 mm thickness)	-	min.	> 20		
Maximum casting thickness		mm	5		

HANDLING PRECAUTIONS

Normal health and safety precautions should be observed when handling these products:

- ensure good ventilation,
- wear gloves and safety glasses.

For further information, please consult the product safety data sheet.

STORAGE CONDITIONS

Shelf life of Polyol part is 6 months, and 12 months for Isocyanate part, in a dry place and in their original unopened containers at a temperature between 15 and 25°C. Any open can must be tightly closed under dry nitrogen.

PACKAGING

Kit N°	POLYOL	ISOCYANATE
07570	4,5 kg	4,5 kg

GUARANTEE

Information of our technical data sheet is based on our present knowledge and the result of tests conducted under precise conditions. It is the responsibility of the user to determine the suitability of AXSON products for his application under his own conditions. AXSON refuses any guarantee about the compatibility of a product with any particular application. AXSON disclaims all responsibility for damage from any incident which results from the use of these products. The guarantee conditions are regulated by our general sale conditions.
